On behalf of the Bruce W. Carter VA Medical Center, we wish to express our deepest appreciation and gratitude to Valor Construction Team for assisting with the emergency repairs of Busduct No. 2. On October 9, 2020, Valor Electrical staff was engaged in the installation of Busduct No. 1. Your staff witnessed the failure of the secondary busduct, causing a major power outage to the Bruce W. Carter Medical Facility. Valor Electrical Staff quickly responded to this emergency situation and assisted the hospital's engineering staff in locating the damaged section of the busduct. After completing a full workday, your team worked an additional eight (8) hours, removing the damaged section of the busduct and arranged the delivery of replacement parts from your West Palm Beach storage facility. Your superior work ethics and project management oversight avoided a potential 2-3 months shut down of a major Veteran Affairs Hospital that is critical to the medical needs of our South Florida veteran community.

We are truly impressed with Valor's leadership and staff in their unwavering dedication to our Veterans and hospital staff. Your team clearly displayed a superior work ethic and dedication assuring that the Bruce W. Carter VA Medical Center would be able to respond to the needs of our veterans without any disruptions.

I would like to thank the Valor Construction Team for their hard work and dedication. Please pass along our gratitude to all of Valor's employees specially the Electrical Division.

Sincerely,

A handwritten signature in black ink, appearing to read "Kalautie S. JangDhari".
